Abstract template for LAPD 19

H. Hawkeye¹*, J. Bruin², M. Martian¹

¹Department of Physics and Astronomy, University of Iowa, Iowa City, IA 52242, USA
²Department of Physics and Astronomy, University of California at Los Angeles, Los Angeles, CA 90095, USA

The header including the title, authors, and affiliations must be center aligned.  **Title** – Times New Roman, size 14 point font, bold.  **Authors** – Times New Roman, size 12 point font; superscripted number references if authors have multiple affiliations.  Underline the presenting author.  Add the email address of the presenting author at the end of the abstract.  **Affiliations** – Times New Roman, size 12 point font, italic, superscripted number references if authors have multiple affiliations.  Affiliation should include institute, city, state and country.  **Abstract body** – maximum 300 words.  This section to be justified, Times New Roman font, size 12 point font.  **Page margin** – US Letter, left and right margin 1 inch (25 mm), top and bottom margin 1 inch (25 mm).  **Line spacing** – 1.5 spacing, insert one blank line between each section of the abstract.  *Do not allow complete abstract (title, authors, affiliations, body, and author e-mail) to exceed one page in length.*  **Abstract classification** – fill out second page of this template and submit with abstract.

*Presenting author: hhawkeye@uiowa.edu
Abstract type (mark one with an “X”)

__ Invited talk (check only if you have already accepted an invited talk invitation)

Contributed talk preference:  __Oral    __ Poster

*Final assignment of contributed talks to oral or poster sessions will be done by the organizing committee. There will be no parallel sessions.*

Abstract classification (mark one with an “X”)

Low-temperature plasmas
__Laser spectroscopy
__Measurements at atmospheric density or on interfaces
__Thomson, Raman, and MIE/Rayleigh scattering
__Absorption measurements
__Other

High-temperature plasmas
__Incoherent Thomson scattering
__Collective Thomson scattering
__Laser or microwave scattering
__Laser spectroscopy
__Interferometry/polarimetry
__ICF and HEDLP
__Other

Instrumentation development
__Lasers
__Detectors
__Other
